Information Technology | Individual

The StaffSync - Modern human resource management solution. is a comprehensive web-based application built using the **MERN Stack (MongoDB, Express.js, React.js, and Node.js)** that streamlines and automates various HR processes within an organization. The system provides distinct roles and access levels for **HR personnel, managers, and employees**, ensuring efficient management and transparency across all operations. HR can manage employee data, handle leave approvals, track attendance, and post announcements or news. Employees can apply for leaves, maintain their personal records, mark attendance, and stay updated with company announcements. Managers can oversee leave requests and manage training and development programs for their teams. This centralized platform enhances productivity, improves communication, and promotes a seamless workflow across departments by digitizing core HR functions.

Skill Credits

1. Environment Setup

Backend

- Node.js
- Express.js
- MongoDB & Mongoose
- JWT
- bcryptjs
- Cors
- Dotenv

Frontend

- React.js
- Axios
- React Router
- Redux Toolkit
- Bootstrap / Material UI

2. Database Collections

- Users
- Employees
- Managers
- Attendance
- Leaves
- Announcements
- Trainings

- Employee Management Testing
- Dashboard Testing

7. Optimization

- Database Indexing
- Lazy Loading
- Pagination
- API Optimization
- Performance Monitoring

Outcome

- Build a MERN-based Human Resource Management System.
- Implement secure authentication and role-based access.
- Develop employee, attendance, and leave management workflows.
- Create dashboards for employees, managers, and HR personnel.
- Manage employee records, attendance, leaves, and training activities efficiently.
- Deploy a scalable and user-friendly HR management solution.
